

Connecting an iPhone/iPad to the UoS-WiFi Service

Connecting an Apple iPhone/iPad device to the UoS-WiFi Service

The University of Salford has added a seamless way to connect your devices to the wireless network available on campus; this user guide will provide instructions on how to connect an iPhone/iPad device using this method. Using this method of connecting will allow your device to seamlessly authenticate whenever it is in range of the wireless service on campus, avoiding the need to constantly enter your username and password into a webpage.

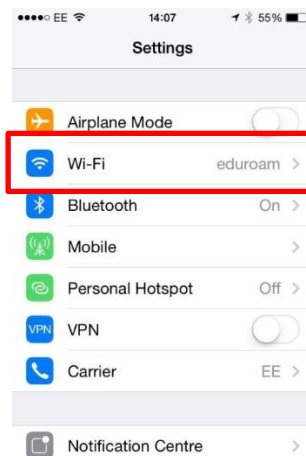

*Please note that software platforms may vary. These instructions use OS version 7.1.2

Connecting to the UoS-WiFi service:

- From your iPhone's home screen find and press the **settings** icon

- On your Settings menu navigate to and press the **Wi-Fi** option

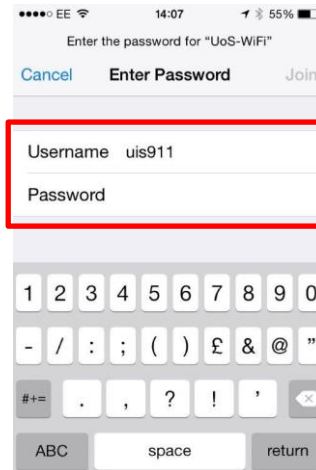

- Your phone will search for all available Wi-Fi networks within range. Once completed select the network named **UoS-WiFi**

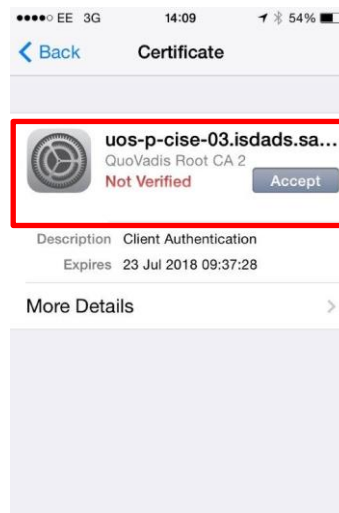

- You will be prompted to enter some details, please populate the following fields:

Username: - <Your UoS User ID e.g uis911>
Password - <UoS Password>

- A prompt will pop up asking you to accept a certificate from uos-p-cise-3 or uos-p-cise-04. Accept the certificate to proceed.

- After accepting the certificate you will be taken back to the Wi-Fi where the network will display the connecting symbol  before then showing as connected

- You are now connected to the UoS-WiFi wireless service.
