COURSE DELIVERY

The course is available in flexible study formats, including full and part-time pathways, delivered on campus or via distance learning. This course comprises eight 15 credit taught modules, followed by a 60 credit dissertation project.

Featured modules:

- Construction Health and Safety and Environment
- Procurement
- Corporate Construction Finance
- Integrated Design and Delivery Systems
- Project and Production Management
- Construction Scheduling and Control
- Value and Risk Management
- Project Management Practice
- Dissertation

COURSE EXPERIENCE

- Learn how to successfully deliver complex construction projects, diagnose problems and manage project teams
- Learn to recognise the significance of processes, technology and people to the success of projects in the construction industry
- Balance work and study with our flexible study options and modular progressions paths
- Gain hands-on training with advanced software tools and techniques used by construction industry professionals

CAREER PROSPECTS

Course graduates use the skills and knowledge they gain to advance their careers for senior management positions. Typical role include construction management, project management, or architectural and engineering design management.

A significant number of our graduates have also progressed to careers in civil engineering, and financial, legal and business sectors. Many have achieved notable success, with numerous winners of the Whiting Award and several receiving awards in the CIOB Building Manager of the Year competition.
