# SIMULATION IN HEALTH AND SOCIAL CARE

---

## COURSE SUMMARY

This unique course is aimed at anyone with an interest in simulation in health and social care, working either in practice or education. Examples include doctors, nurses, physiotherapists, occupational therapist, social workers, midwives and technicians.

The PGCert Simulation in Health and Social Care will equip you with the contemporary knowledge and skills required to develop and advance simulation practice/education in your specific area of practice.

Through the course you will gain an understanding of the underpinning theory of simulation based education and you will spend time in the simulation suites applying this theory to practice.

The course can also form part of the MSc Nursing - Practice (Simulation) pathway.

---

## COURSE CONTENT

This course is designed to give you the confidence to develop and advance simulation in your area of practice or education and is tailored specifically to your needs.

You will have the opportunity to study modules such as Theoretical Perspectives of Simulation-based Education and Practical Application of Simulation-based Education.

---

## CAREER PROSPECTS

By undertaking this programme you will gain a specialist qualification which will enhance your knowledge and skills in simulation based education. Simulation lead roles in health and social care are becoming more and more relevant/popular.

This course is aimed at innovative and creative health and social care practice and education workers who have the ambition to advance practice. This course is applicable for (but not limited to) nurses, midwives, doctors, physiotherapists, radiographers, occupational therapists, social workers and technicians who want to develop their knowledge and skills in simulation based education.

---

# IN BRIEF

- You will have the opportunity to get first-hand experience of using the exceptional facilities in our state-of-the-art accredited simulation centre
- You will be provided with a unique experience of being taught by a multi-disciplinary team of academics
- You will gain a specific qualification which will enhance your credibility as an expert in the field of simulation
- Part-time study available

<b>LOCATION:</b>	Frederick Road Campus
<b>DURATION:</b>	Nine months part-time
<b>START DATE:</b>	September
<b>TYPICAL ENTRY:</b>	You will need to hold a good Bachelor's degree with honours from a UK university (normally a 2:1) or equivalent academic or professional qualification. We welcome applications from students who may not have formal/traditional entry criteria but have relevant experience or the ability to pursue the course successfully via our accreditation of prior learning process.
<b>ASSESSMENT:</b>	Poster presentation, demonstration of self-developed simulation scenario and Viva
<b>DELIVERY:</b>	Simulated practice learning, seminars, independent study, online learning
