

MSc/PgDip/PgCert **SPORTS INJURY REHABILITATION**

COURSE SUMMARY

This course will further the knowledge, skills and abilities of sports rehabilitators, sport therapists, physiotherapists and other allied health professionals currently working in the area of sports injury rehabilitation and prevention.

This course was the first exercise rehabilitation masters, in Europe to be recognised by the National Strength and Conditioning Association (NSCA). The programme is delivered by some of the world's leading experts. The contact sessions on campus, including keynote sessions followed by practical and seminar sessions, are applicable immediately to professional practice and involve a high practical content.

COURSE CONTENT

In order to achieve an award of MSc Sports Injury Rehabilitation you must successfully complete the modules Rehabilitation of Musculoskeletal Injuries and Injury Prevention and Performance Management, along with producing a thesis for the dissertation module.

The PgCert requires completion of one module from the above and two for the PgDip.

CAREER PROSPECTS

Take a lead role in sports injury rehabilitation with this practice-based course and make a difference to your clients with higher level skills. You'll also learn how to conduct research and apply it to the real world, with numerous students successfully publishing their research in peer reviewed journals.

The skills developed within the course are recognised within organisations such as the English Institute of Sport as critical to the development of key competencies. Alumni from this programme include Rick Porter, England RFU women's team head physio (World Cup winner), Jade Leeder, England Squash lead physiotherapist, Ros Cooke, England Netball lead physiotherapist and Charlie Steggles, GB boxing physiotherapist.
