

MSc/PgDip/PgCert ULTRASOUND IMAGING

COURSE SUMMARY

The aim of the MSc Ultrasound Imaging programme is to enable you to critically evaluate current advances in ultrasound imaging, apply an evidence based approach to enhance current and future practice, perform high quality scans in a safe and effective manner and reflect upon all aspects of scan performance to enhance quality of practice.

COURSE CONTENT

During your studies you will undertake the core module, Principles of Ultrasound Imaging, whilst having the opportunity to choose optional modules tailored to your area of interest. Some of these may include Abdominal Ultrasound Imaging, Musculoskeletal Ultrasound Imaging, Gynaecology, Ultrasound Imaging, Early Pregnancy Ultrasound Imaging, Advanced Ultrasound Procedures and Online Research Methods. There is also the opportunity to complete a dissertation to achieve the full Masters.

CAREER PROSPECTS

Completion of this course could help you to progress in your role within ultrasound and apply an evidence based approach to enhance current and future practice.
