Troubleshooting Endnote

I want to make a copy of the references I have so far. Can I do this? How?

Yes, you can.

This is particularly useful if you want to see what references you already have in your EndNote Library. To do this, you need to follow a couple of steps:

- Highlight all your references in your EndNote Library.
- Select the style you want to export them in (the 'Annotated' style is often most useful for this because it includes the title and abstract).
- Click on Edit and Copy formatted.
- Copy them into wherever you want them and save.

If you encounter any problems, please contact your [Academic Support Librarian](#).
