

# List Usage Analytics

# THE LIBRARY

Your reading lists give you instant access to student usage data which allows you to see just how well your students are engaging with the selected material. You can access this data in two different ways:

## Analytics Within a List

To view analytics on a specific list, click the bar chart icon on the top left menu. This opens up engagement information on each specific item. You can also then click *Display list analysis* to see analytics on the list as a whole. To exit this mode and return to the list, click the cross on the bottom right of the page.

Analysis mode is on ✕

## Analytics Tab

You can also view analytics on all of your reading lists by clicking the *Reports* tab on the left hand menu on the website. Here you will find usage statistics for all of your lists, and you can select which ones you would like to see.
