

BSc (Hons)

ENVIRONMENTAL GEOGRAPHY WITH STUDIES IN THE USA / ENVIRONMENTAL GEOGRAPHY WITH PROFESSIONAL PRACTICE

University of
Salford
MANCHESTER

Combine the investigative approach of a geographer with the applied skills of environmental management in order to address the significant environmental challenges faced by society today.

Choose between our two environmental geography pathways to either spend your second year studying at our partner institution, the University of Toledo (Ohio) in the USA, or undertake a placement in industry to gain professional experience.

The entry requirement for this degree is 112 UCAS points (Geography is preferred but not essential) and GCSE Maths / English at Grade C / Level 4.

EXPLORE REAL-WORLD ISSUES

During your studies you will develop skills in geographical investigation, while also studying how to mitigate environmental crisis. Module content also covers topics including sustainability, development and global challenges, corporate environmental management and more.

EXPERIENCE INDUSTRY-LED TEACHING

Our geography and environmental management lecturers are experienced professionals and researchers, active in their chosen fields,

conducting cutting-edge research as part of our Ecosystems and Environment research centre.

UK and international field trips will also form a core part of your studies, giving you plenty of opportunities to apply your knowledge in a practical setting. Recent trips have included Scandinavia and Barcelona, as well as local visits to the Yorkshire Dales and the Peak District.

STUDY IN THE USA PATHWAY

Building on over 30 years of successful exchanges, you will spend the second year of your study based 1 hour from Detroit in the city of Toledo, where you can apply your studies to new urban and rural environments.
