

Introducing Construction Information Service (CIS)

CIS is an online database from which you can quickly access current regulations, construction standards, technical advice and industry news on building, engineering, design and construction processes in the United Kingdom and Republic of Ireland.

Updated weekly, the CIS offers a powerful search engine to find authoritative information for every stage of the construction lifecycle, from design and completion to operation and ongoing use. Easy-to-use search filters allow you to query 23,000+ documents from 300+ publishers and more.

CIS is particularly useful for: *Architecture, Architectural Design and Technology, Building Surveying, Civil Engineering, Construction, Construction Project Management and Construction Law, and Quantity Surveying.*

CIS includes valuable and up-to-date construction-related information, including:

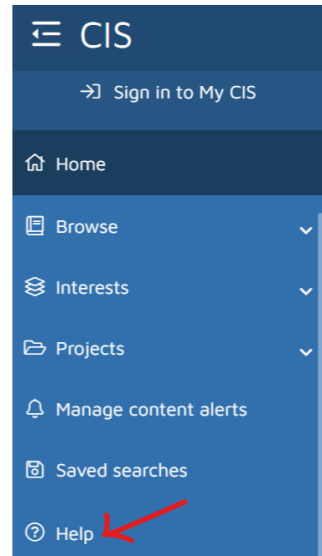

- BRE reports and papers
- CIBSE guides and documentation
- CIOB papers and technical information documentation
- FIDIC contracts, guides and procedure documentation
- JCT agreements, contracts and frameworks
- RIBA contracts, guides and documentation
- Statutory instruments
- Various construction-related legislation, building regulations, reports, guidebooks and manuals.

CIS can be found in [Library Search](#) and is accessible both on and off campus.

Watch this video to find out more.

Need further help using CIS? Check out the built-in help guides once you have logged into the database:

Contact your [Academic Support Team](#) if you need further help.
