

# Linking to Sections & Items in Blackboard (Ultra)

You can now use the tools on Blackboard Ultra to link directly to reading list sections (or individual items) from within your teaching materials. Just open your module and follow these steps:

- In Blackboard, find the week where you want to add a link and click the small **+** and select **Module Tools**
- On the menu that loads, click the small **+** on the Reading List section and this will add a Reading List link to your Blackboard page

Once a reading list link has been inserted in this way, you can then choose what it actually links to by:

- Clicking on the link to open the reading list
- Find the section (or item) you wish to link to and click ...
- Choose **Re-link from Blackboard to here**
- Click ok to confirm you want the link to redirect to this section/item
- You can now exit the reading list and your link will now load the section/item you have specified
- You can now edit the link on Blackboard to change title/description etc.
