8.	Survey Report	13

1. Economic Outlook

During the second national lockdown (with closure of hospitality and non-essential shops) in November 2020, UK GDP fell by 2.6% month on month and was 8.5% below February 2020 level, ending the six months of consecutive growth experienced in the UK over the summer. The November's fall in GDP however, was less than the 5.7% contraction predicted. Output in the service sector decreased by 3.4% (driven mainly by accommodation and food services, wholesale, retail and motor trade; other service activities; arts, entertainment and recreation) as opposed to a fall of output by 0.1% in the production sector and an increase by 1.9% in the construction sector(Source: ONS)¹. GDP is forecasted to fall also in the final quarter of 2020 and first quarter of 2021, with the UK heading for a double-dip recession. According to the OECD, the economic recovery in the UK in 2021 is also expected to be slower than in other large economies (4.2%), due to the bigger service sector, low business confidence and investment, as well as Brexit.

2. Employee Jobs by Industry in Salford

According to ONS Business Register and Employment Survey (2020), approximately 74.3% of employees in Salford are working within 8 main industries:

¹ https://www.ons.gov.uk/economy/grossdomesticproductgdp/bulletins/gdpmonthlyestimateuk/november2020

3. How many employees are working in those industries with the highest take-up rate of the *Job Retention Scheme* (furlough scheme)?

Of major interest is the fact that 49,500 individuals, which is 35.4% of total employees in Salford, are working within the 5 sectors with the highest take-up rate of the Job Retention Scheme (JRS). These industries are: Arts, Entertainment and Recreation (45%); Accommodation and Food Service Activities (45%); Manufacturing (35%); Wholesale and Retail Trade (34%); Education (32%) ². The 35.4% is high but lower than the 43.29% in GM, 43.1% in NW and 41.99% in GB (as shown in the table below).

More information about these statistics is available at:

https://www.gov.uk/government/statistics/coronavirus-job-retention-scheme-statistics-december-2020

Notes:

1. The term "employer" should be considered equivalent to a PAYE scheme.

- 2. Sector information is based on the Interdepartmental Business Register (IDBR) produced by the Office for National Statistics.
- 3. Where a CJRS claim has not been able to match to other HMRC data, it has been reported as 'Unknown'.
- 4. The unknown figures for eligible employers/employments and employers/employments furloughed are not comparable.

Thus, a take-up rate cannot be calculated. This is because they are unknown for different reasons.

- 5. The value of claims figures include all claims received to the end of October for staff furloughed in periods up to and including 31 October 2020
- 6. The total figure for the value of claim may differ slightly from those in the Public Sector Finances statistics publications.

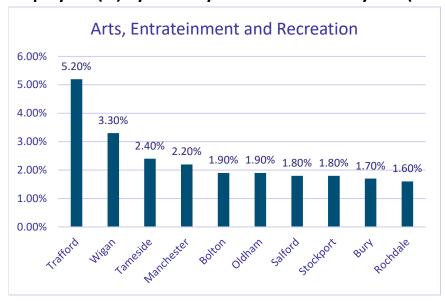

² Percentages in brackets indicate the % of businesses within the sector that have applied for and obtained the Job Retention Scheme (i.e. take up rate at 31 October 2020, latest available data at the time of writing). <u>Source: HMRC CJRS and PAYE Real Time Information</u> (2020).

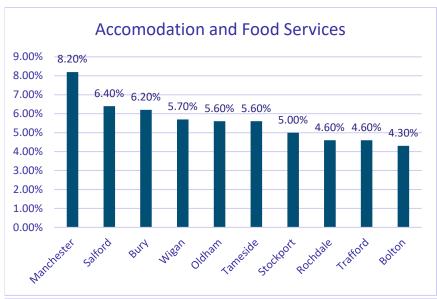

Employee Jobs (%) by Industry	Salford	GM	NW	GB

Below you can see a comparison with the other 9 local authorities in Greater Manchester: Employees (%) by Industry and Local Authority GM (2019)

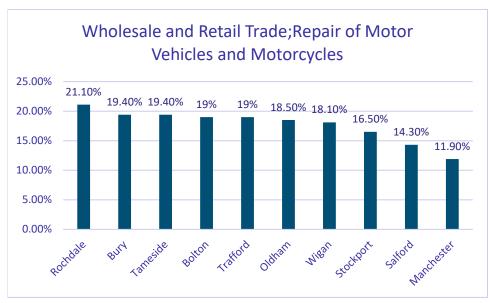

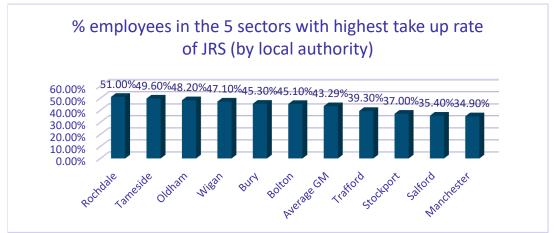

Source: Own elaboration based on ONS Business Register and Employment Survey (2020)

Source: Author's own elaboration of data from ONS Business Register and Employment Survey (2020)

As it can see in the graph below, Rochdale, with 51%, has the highest percentage of employees working within those 5 sectors with the highest take-up rate of the Job Retention Scheme (JRS) (i.e.: Arts, Entertainment and Recreation; Accommodation and Food Service Activities; Manufacturing; Education; Wholesale and Retail Trade, Repair of Motor Vehicles and Motorcycles), followed by Tameside (49.60%), Oldham (48.20%) and Wigan (47.10%), while Salford has the second lowest (35.4%).

<u>Source:</u> Author's own elaboration of data from <u>HMRC CJRS and PAYE Real Time Information</u> (2020).

Across the UK, the wage of over 9million employees at more than 1 million companies have been subsidised by the JBR scheme (furlough scheme) since its launch. The scheme has been extended until the end of April, with the Chancellor expected to provide an update at the March budget.

According to the British Chamber of Commerce (BCC), although the JBR scheme has saved many businesses and jobs, however, further measures that cover the whole of 2021 should be put in place before the March

budget. Among others, businesses are asking for: i) a further year of business rates relief; ii) extension of 5% reduced VAT rate for the hospitality sector.

4. CJRS Claims by employer size

The majority (99.5% of 11,075) of Salford's enterprises are classified as micro (0-9 employees) , small (10-49 employees) or medium (50 to 249 employees), implying they are more vulnerable to the crisis and will need more support and guidance from the council. This is also further emphasized by the limited access to JRS (see details and figures below). The total number of micro enterprises in Salford is 9,990, which is 90.2% , slightly higher than the 88.8% for the North West region. Only 0.4% of Salford's enterprises, which is a total of 45, are classified as large enterprises employing more than 250 employees, the percentage is the same as the one for the NW region *Data Souce: ONS Inter Departmental Business Register (2020)*. According to the HRMC, the average take up rate of JRS at 31 October 2020 was lower for micro and small businesses , being 33.8%, as opposed to an average take up rate of 46.3% for medium and large enterprises. The average take up rate for micro employers, which represent 90.2% of businesses within the Salford's economy, was only 28.3% at 31 October 2020, which clearly indicates that micro businesses did not benefit of the JRS as much as the medium and large enterprises. *Source: HRMC CJRS (2020)*³

urce: HMRC CJRS and PAYE Real Time Information

ole Notes:

Employer size has been determined on the basis of an estimate of the number of employments eligible for furlough under CJRS.

The term "employer" should be considered equivalent to a PAYE scheme.

Where a CJRS claim has not been able to match to other HMRC data, it has been reported as 'Unknown'.

The unknown figures for eligible employers/employments and employers/employments furloughed are not comparable. Thus, a take-up rate not be calculated. This is because they are unknown for different reasons. See methodology section of report for more information about a unknown category.

The value of claims figures include all claims received to the end of October for staff furloughed in periods up to and including 31 October 2020

The total figure for the value of claim may differ slightly from those in the Public Sector Finances statistics publications, please see the methodology section for more details. e information about these statistics is available at:

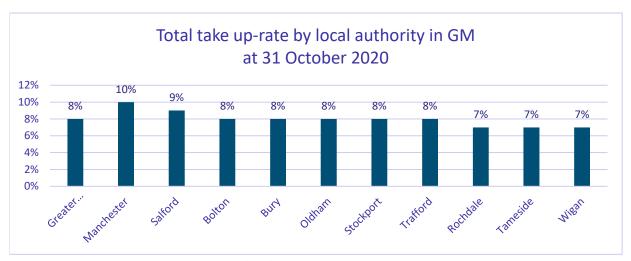

s://www.gov.uk/government/statistics/coronavirus-job-retention-scheme-statistics-december-2020

5. CJRS Furloughed employments by local authority

At 31 of October 2020, Salford had the highest CJRS's take up rate among the GM local authorities, second only to Manchester. The CJRS's take up rate in Salford, in fact, was 9% (a total of 11,200 employments furloughed) as opposed to 7% average in England, 7% in the NW and 8% average in GM. Source: HRMC (2020).

County and district /	Total employments	Total eligible	Total	Total take	Total take up-	Total take
unitary authority	furloughed	employments	take	up-rate	rate	up-rate
	at 31 October		up-rate	at 31	at 30	at 31
			at 31 July	August	September	October
Greater Manchester	103,900	1,275,000	17%	12%	10%	8%
Metropolitan County						
Bolton	10,100	124,200	16%	12%	10%	8%
Bury	7,100	87,000	17%	12%	9%	8%
Manchester	23,000	241,200	19%	14%	11%	10%
Oldham	7,600	99,900	16%	12%	9%	8%
Rochdale	6,700	94,500	15%	11%	8%	7%

Source: HMRC CJRS and PAYE Real Time Information (2020)

Source: HMRC CJRS and PAYE Real Time Information (2020)

6. Claimant Count (November 2020), Inactive Population, Earnings

In Salford, the claimant count increased from 4.3% in March 2020 to 8.4% in November 2020 (a total of 14,335 claimants in November 2020), this figure is higher than the claimant count in the North West (7%) and GB (6.3%), but lower than the average for GM (8.61%) in the same month (Nov. 2020). Within Greater Manchester and in comparison with Salford, four local authorities, i.e.: Oldham, Manchester, Bolton and Rochdale, had higher percentages of claimants as a proportion of the resident population of the same age in November 2020. Trafford had the lowest (as shown in the graph below):

Source: Own elaboration based on data from: ONS claimant count by sex and age (2020). Note: % is number of claimants as a proportion of resident population of the same age.

The percentage of those aged 18 to 24 claiming benefits in Salford in November 2020 was 10.4%, which is slightly higher than for the NW (10%) and GB (9%). The percentage of those aged 25 to 49 claiming benefits in Salford in November 2020 was 9.3%, significantly higher than for NW (7.8%) and GB (6.9%)⁴. This implies that unemployment in Salford is high not only among the youngest population but also among those aged 25 to 49.

We can expect these figures to increase even further in the coming months The claimant count in Salford, in fact, has been progressively increasing since November 2018, when it was 2.8%. ⁵

In Salford, 20.2% of the population aged 16-64 (i.e. 33,000 individuals) was economically inactive between June 2019 and June 2020. Of these, 21.6% were students, 23.3% were looking after family/home, 31.8% were

⁴ Source: ONS Claimant count by sex and age

⁵ Data Souce: ONS claimant count by sex and age (2020).

long term sick (this 31.8% is much higher than the % for NW, 27.9% and GB, 24%).⁶ The average gross weekly pay of full-time workers in Salford was £534.7 pounds, less than the NW (£588.6) and GB (£622.9). ⁷

7. Inequality: The Index of Multiple Deprivation (2019) and Child Poverty in Salford

- 1. Salford is the 18th most deprived local authority area in England (out of 317) compared to 22nd most deprived in 2015. Most other areas within Greater Manchester also have a worse rank and Salford remains the third most deprived district in the city region (after Manchester and Rochdale⁸).
- 2. There are 76,400 people (30.4%) who reside in a highly deprived area of Salford, compared to 71,200 people (29%) in 2015. However not everyone living in an area of high deprivation will themselves be highly deprived.

 Further, 10,500 residents of Salford live in areas of extreme deprivation.
- 3. These areas are mainly concentrated around Langworthy, Irwell Riverside, and Broughton in Central Salford with smaller pockets in Little Hulton and Winton wards.
- 4. Some parts of the city have seen a positive change in deprivation with the biggest relative improvement in the areas around Salford Quays, Trinity Way to Salford Central Station and the eastern end of Regent Road.
- 5. The areas with the biggest relative decline in deprivation are Parr Fold in Walkden South, the western part of Worsley and the area around Adelphi Street in central Salford.
- 6. The IMD is made up from 7 domains of deprivation. At the domain level the biggest decline has been in the Crime domain (down 57 places to 16th most deprived). The greatest improvement for Salford has been in the Health domain (up by 5 places to 12th), and the Employment domain (up 4 places to 30th) relative to other local authorities ⁹

Answers to Open Ended Questions

Results (Q2-Q40)

Key Highlights

45 Responses

This is the first and only survey that focuses on capturing the impact of Covid-19 on business in Salford. Response Rate: Less than 1%

There are a total of 11,075 enterprises in Salford (NOMIS, 2020).

Collection Period

76% of responses collected between Monday 30th November and Monday 14th of December 2020 . GM remained in the strictest tier 3 during this period.

100% of Respondents are SMEs

95.55% of respondents are micro (0-9 employees) or small enterprises (10-49 employees). 4.44% are medium (50-249 employees). Salford's enterprise population :99.5% of enterprises are SMEs (ONS, 2020).

Wholesale And Retail Trade; Repair Of Motor Vehicles And Motorcycles

The majority of respondents ,22.22% ,identify this sector as their main principal activity. Salford's population:14.3% of workers are employed within this sector. This is the highest % among all sectors.

2020-21 SBS Salford Covid-19 Business Survey Key Highlights

5

80% Continuing to Trade

80% of respondents were continuing to trade when the survey was completed; 20% were temporary closed or temporary paused trading. This is in line with the findings of the Growth Hub's survey at the same time:77.6%.

6

Reduced number of working hours and redundancies

73.33% of respondents had reduced the number of working hours of employees as a result of Covid-19. 77.78% did not make redundancies and are not planning redundancies (in line with the findings,74.8%, of the Growth Hub); 20% did not make redundancies but were not sure about redundancies in the near future.

7

Lack of Diversification and Online presence

68.89% of respondents did not diversify to produce or provide new services as a consequence of Covid-19. 73.33% of respondents did not start to sell online, with 53.33% claiming this is not applicable to their business. Only 28.9% agreed that there has been an increase in innovation.

Key Highlights

8

Uncertainty and Business Confidence

48.89% of respondents are uncertain regarding what to expect in terms of increase/decrease in turnover within the next 3 months. 22.2% are not sure about how long their cash reserves will last and 24.4% are not sure if they will return to trade within the next 3 months.

9

Cash Reserves

Only 26.67% of respondents expect their cash reserves to last more than 6 months. This is significantly less than findings from Growth Hub, according to which the % for Salford businesses in the same period was 58.7%.

10

Job Retention Scheme (JRS) and Recruitment

44.44% of respondents had applied for the JRS .This is in line with the take up rate at 31 October 2020 as reported by HMRC (i.e.: Accomodation and Food Services: 45%; Arts, Entrainment and Recreation: 45% Wholesale and retails sector: 34%). A total of 11,200 employments furloughed at 31st October 2020 as reported by HRMC. 82.2% of our respondents did not recruit new staff in the last 3 months, higher than findings of Growth Hub, 77.6%.

Key Highlights

11

Decrease in Turnover

The majority, 37.7%, of respondents reported a decrease in turnover in the last three months between 20 an 50%. 24.44% reported a decrease in turnover grater than 50%.

12

Main challenges returning to trade

The major challenges faced returning to trade were, in order: 1) operating safely (80%) 2)contracts and supply chain (77.78%)3)workforce planning (73.33%) 4)supply chain failure (66.67%) 5)business finance and funding (53.33%). See Q24 for additional information. These factors were also the factors identified by Growth Business Hub survey for the same period in GM.

13

Working From Home-WFH-

The majority of respondents 57.7%, indicated that none of their employees is working from home and 88.89% of them expect their workforce to be working in the usual workplace in three months time. This is due to the sectors within which the majority of our respondents operate. Further investigation (i.e. interviewing large employers) is needed to better understand the future of work in Salford.

Key Highlights

14

The Role of the Council

Based on the answers to open ended questions, businesses would like to be directly and individually contacted (e.g. by phone) as well as to have a direct contact to refer to at the council. e-mails should be less generic and more sector specific. Website to be timely updated.

15

The Role of the University

Based on the answers to the open-ended questions, it is clear that businesses in Salford see the University as having a leading and active role in promoting adaptability, resilience and recovery by offering appropriate training courses, networking opportunities and by gathering and sharing relevant information.

Next Steps and Recommendations

01

Sharing Results and Website

Share the results of the survey with Salford's business community in real time, A website hosted and curated by Salford Business School has been created for this purpose. Results have also been timely shared with relevant contacts at Salford City Council and the Growth Hub. Regular updates on Economic Outlook and Business Environment to be included in the website in response to the request from SMEs to widely and freely share relevant information .

02

Next Survey and Interviews

A new survey will be circulated in February 2021 to cover the next quarter. Interviews with large employers are being scheduled to further investigate the future of work in Salford .See also action point 6 below.

03

Training Courses

Since respondents recognize that the University should have an active role in promoting and supporting the adaptability and resilience of businesses in Salford, we are planning to offer a number of training courses, workshops and webinars on: digital transformation, e-commerce, digital marketing,, cash-flow management, finance and funding, etc...Details will be discussed and finalized by a focus group lead by Salford-based SMEs.

04

Peer-Networking

Since respondents have asked for sector specific support, we intend to organize peer-networking groups which are sector specific to promote resilience and adaptability. The programme will be opened to all SMEs based in Salford, even those with a turnover less than £100,000 and facilitated by trained experts .

05

Supporting Diversification and Digital Transformation.

68.89% of respondents did not diversify to produce or provide new services as a consequence of Covid-19. 73.33% of respondents did not start to sell online, with 53.33% claiming this is not applicable to their business. Our training courses and peer-networking project will focus on promoting resilience, adaptability, growth and digital transformation.

06

Direct Link/Contact with Businesses

Despite the support already available, many respondents would prefer the council to directly contact them by phone, as well as have a specific point of contact to discuss covid-related issues. We are currently contacting businesses and will continue to do so until the end of funding in July. 2021. SBS and Council should meet to discuss the above further.

Q26: Could you please specify how your business has diversified as a consequence of the Covid-19 pandemic (e.g. different business model, new products and services, etc..)?

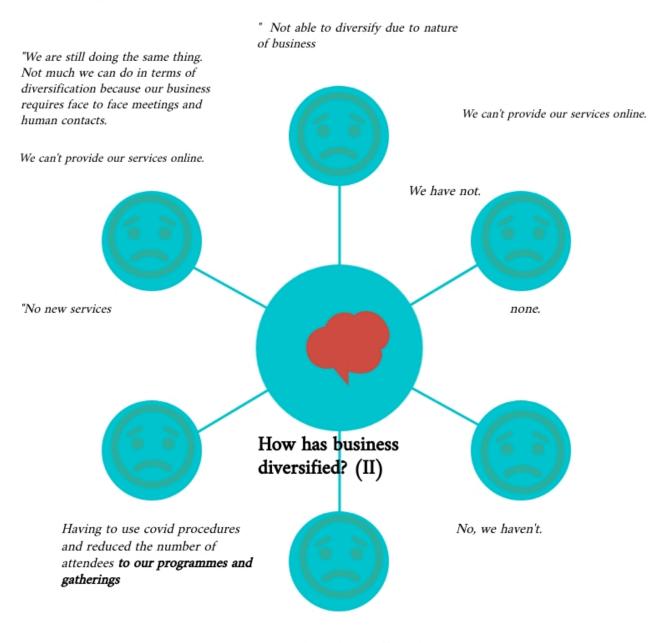

We now offer an automated **online** quotes to customers.

We have always offer online delivery services even prior to the lockdown. No, no different business model has been adapted.

Customers are now able to fill in online form to get quotes on our services. We are also now able to contact customers through emails We have always offer online delivery provided on the quote form.

Q26: Could you please specify how your business has diversified as a consequence of the Covid-19 pandemic (e.g. different business model, new products and services, etc..)?

We have always offer online delivery services even prior to the lockdown. No, no different business model has been adapted.

Q35: How could communication to businesses regarding temporary required adjustments and social distancing be improved?

We don't know what to do or whom to contact. We need a direct contact or source who could lead us in the right direction. "By contacting businesses" By sending letters to outline the required adjustment and changes' "We need direct links with decision-makers. Factual findings also need to be available to every member of the Regular updates via email or text. public this could reduce the high level of uncertainty". Haven't been contacted personally by First, start by contacting local the council business. More clarity and facts presented to businesses Remote Q&A with decision makers **Improve** Communication (I) I don't know. The news and By actually contacting businesses. government website keeps everyone updated. "I personally haven't heard from the council. I wonder if the beauty industry is taken seriously by them" T watch the news and I make sure I am well informed of any changes as most information has been made easily available "Sending out personalised emails and by the government. I have no suggestion. letter. We also need a specific point of contact."

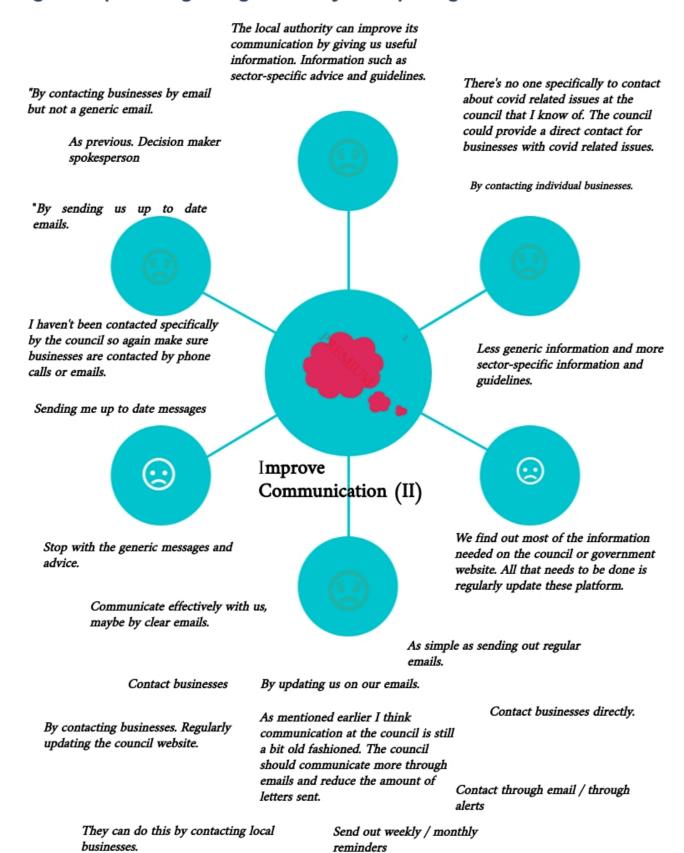

Perconally I think the cou

Personally, I think the council specifically can improve the way they communicate. There is a lot of pen and paper communication going on at the council which I think it's absurd. I think they should communicate more through emails rather than letters.

Communication has been all right.

Weekly information packs as well as emails sent letting business know of major changes. As well as an only zoom meeting that explains and concerns or issues

Q37: How could the local authority improve its communication to the general public regarding the safety of reopening businesses?

Q38: What kind of support do you think institutions such as the Salford City Council and Universities could provide?

Share knowledge for better understanding.

The university could offer free online classes and training for businesses.

Regular advice through phone calls / emails as well as some sort of financial benefit scheme

Keep businesses updated about changes and ways to implement change..

By sharing relevant knowledge and

skills

Required training and guidance

By appointing someone or a team of people with knowledge and skills to help businesses to provide sector-specific advice and guidelines instead of the generic information found on the council website.

Provide businesses with training and courses on how to survive during a pandemic.

Sector specialists talking to their

Use local services as much as possible particularly if already a supplier

By working to keep the local community informed and up to date with relevant and necessary information.

Support such as training and development for businesses.

Free online courses for businesses on how to survive during a pandemic

Support tailored to specific businesses in Salford. And also by gathering and sharing relevant and useful information.

The Role of SCC and the University

Educate businesses and guide businesses on what to do.

knowledge, academics at the university has more knowledge about what is going on and could share this knowledge with local businesses. They could do more research and find out ways to support us. This support could include courses, workshop but it also has to be costeffective.

Free courses. They can help in delivering support for business life after covid.

The council could advertise and promote local businesses more.

Talks / internet seminars for businesses to advise them

The university and council can provide free business courses for business owners. The council can also make more grants available to business owners.

Help businesses stay prepared for any unforeseen circumstances that may occur. There was a lot of initial shocks and everybody seemed to not have been prepared. In my opinion, even government officials such as the council weren't prepared for the pandemic..

I can't think of any support at the moment because it's a bit too late now as we are coming to the of everything. Hopefully. However, more research can be done to make sure every business owner within the community are getting the support needed. Some clients of mine were unable to get access to a lot of grants because they have been open for less than a year which was very unfortunate, they have had to claim universal credit instead of business grants

Q39: In which ways has the Covid-19 impacted your business?

Fewer sales but the pandemic have made us more innovative.

We have had more demand than ever before which was unexpected. We have also had to change a lot rapidly. Changes like having a new supply chain, extending our services in terms of the way we deliver our products. We have definitely experienced a lot of growth. There is a lot of uncertainties and for the most part we have had to do a lot of things differently. We have stayed open because we had to increase our online presences by making sure customers can now order from every delivery app in the UK. We have also had a lot more order during the pandemic.

We are classed as essential so therefore we have been impacted positively because we a lot more sales now. Way more than expected. Although we do sell out on most products quicker than planned because customers tend to buy in bulk even though we have a system set in place to limit the amount of products per customers, we are often left with empty isles.

2

We have remained closed which means we have had zero income. We don't sell or offer any other services online.

High cost and low revenue. Struggle to keep the business open.

Adapting to the nachallenging but we

Adapting to the new norm has been challenging but we have continued with our usual activity. What we struggled with initially was securing new contracts and clients because there was a lot of uncertainties.

The Impact of Covid-19(I)

Our organisation has not been impacted negatively in terms of revenue and turnovers. We did struggle with capacity during the pandemic, we had a lot of patients phoning in and we had to refer a lot of people to other organisation because we couldn't have helped has we didn't have the right amount of resources or man power.

We have completely changed the way we run and deliver our services. This is the new norm but we are trying to get used to it. We are closed. We can't

We are closed. We can't take any more appointments, old appointments had to be cancelled which means a lot of customers hare requesting to have refunded. We are unable to issue refunds which makes the situation even more stressful.

We had nothing to do most days because we don't get customers which can be very discouraging. Fewer sales, creativity has been impacted negatively. it was initially a struggle to stay afloat but we have been able to continue trading because we were able to adapt quickly and increase our online presence. This has helped increase sales gradually. Although we miss the face to face interactions with customers.

Lower revenue. This has been a hug shock and was very much unexpected, I have had to invest in renting a new place in other to comply with the government requirements.

Q39: In which ways has the Covid-19 impacted your business?

Hard times but my business and workers IT skill has improved. We have also adapted new skills and new way of thinking.

The opening and closing of stores and business has affected our business. Although we are beginning to see more online sales on our website. We were gravely affected during the first lockdown. Summertime has always been our busiest time of the year where we generate more income and employ even more workers but that wasn't the case this year. We were forced to close our doors which affected us financially. We also had to let some of our most hardworking employees go because we just couldn't afford to have them working for us. We are still faced with the same challenges as the fist lockdown even now that we are in the tier system.

In every way.

(2)

We have fewer clients now and we can't visit clients at the moment. Most of our income is generated from going to see clients and providing quotes.

or customers to do our job.

We have been unable to visit clients

Financially, staff mental welbeing.

The Impact of Covid-19(II)

(:

Less sales.

The opening and closing of stores and business has affected our business. Although we are beginning to see more online sales on our website. We have had to close down our businesses.

We are classed as non-essentil so we have had to remain closed during the lockdown. Although we are back opened now, we are still unable to function properly. We also depend heavily on our online presence and we recommend customers to view properties online. However, most customers do not feel comfortable viewing houses online as they would rather view in person. This has had a negative impact on our turnover.

Financially, we have fewer sales instore even though we offer uber and taxi delivery services yet we receive fewer orders. Reduced sales yet we are faced with the same bills each month which can be very difficult. Due to the restrictions, we have fewer customers in stores which also prevent sales. Emotional stress, we are uncertain about the future.

Remained opened because we are classed as an essential shop. Getting customers to follow government guidelines in stores has proven difficult. Sales has also declined Our customers mainly, we have been able to get support from the government. However, our customer's mental health has been affected. Majority of our customers are also unemployed

Q39: In which ways has the Covid-19 impacted your business?

After initial stagnation things have picked up.

Fewer sales but the pandemic have made us more innovative.

We need to restructure and change our business plan.

Having to comply with the rules and enforce them on customers can be hard.

Covid hasn't affected my business in particular because I provide Accounts bookkeeping and payroll services. But, it has affected a lot of my clients. We have been forced to temporarily close down our business because we couldn't cover the operating cost. We have also had to let most of our workers go, this has been emotionally draining. We have been unable to apply for some government loan and grants because we started our business less than a year ago. The process has been extremely stressful. So as you can imagine we were affected tremendously, financially, staff were left feeling anxious and stressed. We just weren't prepared for this at all

We have remained closed during the lockdown which means we haven't had any businesses or new client. Our business thrives on remaining open and being accessible to daily new clients.

The Impact of Covid-19(III)

Council and other clients cancelled events due to gov restrictions so no marquees booked. Not used local Salford business for testing centre set up.

> Lost a large amount of income and customer support! Couldn't pay staff as well as keep up with running costs

> My business has been closed during the lockdown because we are classed as 'nonessential' shop. No income has been generated during this time.

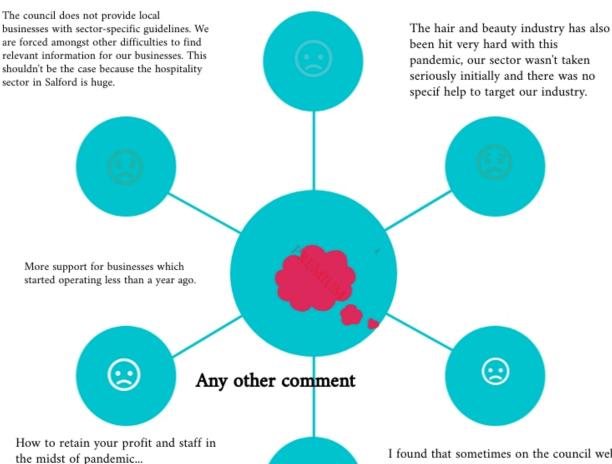

> > Less sales and less customers.

Can't trade, had to unemploy meme era of staff. Struggling to keep the business running

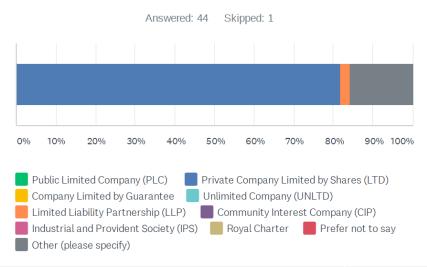

We have been impacted financially because we don't get as many customers as we used to. We have also had to lay some workers off. In a lot of ways, fiance is a big one. Our regular clientele has reduced dramatically, most customers don't come in anymore because of the new measures. Although we do get some customers bookings online when the government decided for us to be back open. Our cost has increased due to the fact that we want to maintain our previous prices. We work long hours which can be very exhausting and wearing the face mask or face shield can be uncomfortable. Like I said we are struggling financially especially with the HMRC. Our concerns and struggles are mainly with the HMRC rather than the council because we have to pay taxes and VAT on top of everything going on. Even though these have been deferred we still have to pay it back in the future.

Q40: Is there any other observation/issue (Covid-19 related) that you would like to bring to our attention?

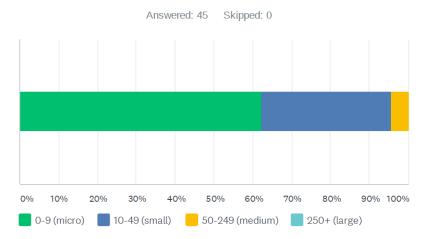

Sector specific support offered to many sectors but events supply chain has been forgotten I found that sometimes on the council website, information about local council grants are sometimes delayed or not uploaded in time. I was told that the local council grants, in particular, have been extended but I am yet to find out more information on the Salford City Council website. In terms of my business, I am happy but as I said, the grants and funding need to be more inclusive. A client of mine who has a community interest company was unable to claim any grant from the council and was advised to claim a specific type of grant which was proven to be more difficult and complex. She was also adviced to go use a specialist accountant to help with the application which meant she had to leave me and that's me losing a client. This application shoud be straight forward and not complex.

Q2 The legal status of my business is:

ANSWER CHOICES	RESPONSES	
Public Limited Company (PLC)	0.00%	0
Private Company Limited by Shares (LTD)	81.82%	36
Company Limited by Guarantee	0.00%	0
